

Product Catalog

We are proud to offer a fully customizable suite of various product options that range from buttons to other similar products. The first step is to select or create a highly detailed design that provides meaning to your product. The second step is to tell us how you are going to be using the product and we will work with you on the best attachment or 'Back' you need for the product.

Front

The front design is customizable across seven categories: Image, Background, Size, Edge Detail, Burnish, Dome Height, and Finish.

Image: Choose or create your symbol or logo as the centerpiece of the product design.

This is our hallmark. Whether you want to showcase your company logo, a special symbol, or a unique design, we can create customized images for your products with an extremely high level of detail. Using modern and traditional techniques dating back to our founding, we develop hardened steel tools to stamp brass leading to the highest quality and detail. You can choose from our archive of over 40,000 images in stock, or develop a new tool and custom design. Whatever your image needs are, we can help you make the perfect piece for your project. Sample images are below and included throughout the catalog:

Background: Build texture behind the image design.

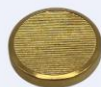

Plain

Florentine

Pebbled

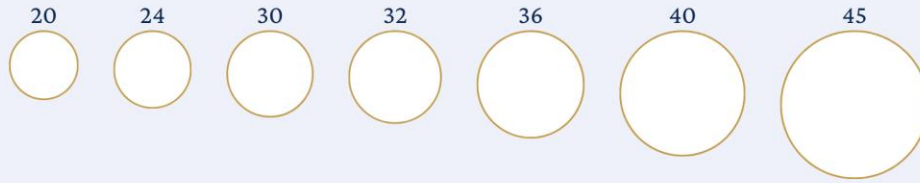

Line Horizontal

Line Vertical

Size: Scale the product size to fit your needs (ligne size, 1 ligne = 0.25inch, estimated scale below):

Edge Detail: Provide a border to surround your button image.

Plain Rim

Burnished Rim

Rope Rim

No Rim

Burnish: Add an extra process of smoothing to the edges.

Rim

Face

Inner Ring

Dome Height: Add depth to your product, or keep flat for a clean look.

Flat

Medium

High

Finish: Completes the product look with customizable plating and final lacquering.
